THE AUTOMATION PLATFORM FOR THE FUTURE OF WORKSPACES

For more than a decade, Uteology has built the system of record for meeting spaces, devices, and collaboration environments. This deep telemetry, combined with vendor-agnostic control and enterprise-grade governance, forms the foundation for AI-driven automation at scale.

As organisations demand higher uptime, lower operational costs, and consistent global experiences, Uteology becomes the digital workforce that monitors, diagnoses, and resolves issues autonomously — reducing truck rolls, eliminating downtime, and optimising room utilisation.

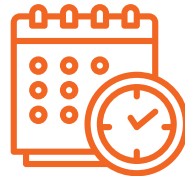

REMOTE MONITORING, ALERTS & REPORTING

Gain a 360-degree view of your connected estate - monitor devices, rooms, systems, connectivity status and usage in real-time.

MAXIMIZE UPTIME AND MTTR

Remotely configure, manage, monitor, and control AV and UC systems. Reduce Meantime to Resolution (MTTR) up to 75%.

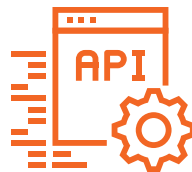

AUTOMATION

Workflows and automations reduces the risk of user errors and self-healing triggers fixes issues proactively.

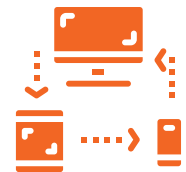

DATA ANALYTICS

Quantify and report on cost reductions, ROI, and increased productivity based on data driven metrics.

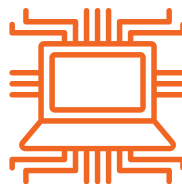

INTEGRATIONS

Vendor-agnostic orchestration across AV, UC, network, scheduling, and ITSM systems.

DEPLOYMENT AT SCALE

Get rooms up and running faster. Our secure, configuration tool makes it easy to deploy and scale regardless of location.

GLOBAL ARCHITECTURE

Multi-data center architecture for redundant data storage, data sovereignty and enhanced performance.

ASSET MANAGEMENT

Easily track hardware warranties, license renewals, firmware versions, and refresh cycles.
